Coating option

Acoustic
Laminated glass option

3+ styles
Awning, sliding, double hung

About the Window

Lower heating and cooling costs. Cuts outside noise.

Every window is built to your exact opening at our Blackmore Road workshop in Smeaton Grange. You choose the layout, glass, colour and screens, and the same team that builds it installs it.

Installed across Macarthur

Smeaton Grange · Oran Park · Gregory Hills · Harrington Park · Gledswood Hills · Narellan · Minto · Campbelltown

Key Features

- Two panes of glass are separated by a sealed spacer, creating an insulating gap
- The gap is filled with air or an inert gas that slows heat transfer
- Less heat moves in or out, so rooms stay warmer in winter and cooler in summer
- The sealed dual pane design absorbs and deflects far more outside noise
- The insulated inner pane stays closer to room temperature, reducing condensation
- Two panes plus quality locking make the window harder to force
- Available across awning, sliding, double hung and other window styles
